

2009 Honors Biology Summer Project

By now you should have received an email (Christchurch account) inviting you to join Dr. Carrillo's Science class "Ning". Please follow the link and join my network.

Once you are "in", please set up your member's page and join the Honors Biology Group. If you need help, look at the video posted giving you a tour so you know your way around.

I have the first question posted under the Forum heading. Please answer it and check back to join in other discussions and comment on items that I post.

If you are having problems you MUST come see me before you leave. I should see your member page before you leave. No excuses. If I do not hear from you all summer, you will be dropped from the course.

Dr. Carrillo
